- Back-end server with Golang / Node.js & Express.js

Ryan Nguyen

Summary

I'm Ryan Nguyen, a former Sous-chef who is now a passionate full-stack developer. I am excited to bring this unique perspective to collaborative tech projects! Currently I'm holding New Zealand Residence Visa.

Experience

Freelancer/Contractor
New Market, Auckland
09/2023 – Current
I am currently one of the contributors to the content of a tech YouTube channels that has about **25k+** subscribers on YouTube and **50-100k+** view videos, and also one of the moderators in that active discord community, providing free educational content for people wanting to get into the tech world.
With a small team (under 10, with only 3-4 developers currently), our latest content hit **100k** views under 5 days, got 15+ offers from companies in the USA but the source code are free and you can build your own from it.
A few other completed projects I have built after graduating from Dev Academy, having **10-25** active users includes:

- *GlorifiedTodos* - a tasks management board for teams & organizations: https://glorified-todos.vercel.app/
- *Cypress* – a collaborative whiteboard with workspace/folder/file system managements: https://cypress-collaboration.up.railway.app/
- *Quill* – an AI chat with your pdf: https://quill-sooty-zeta.vercel.app/
- *Messenger* – a simple facebook messenger clone: https://messenger-clone-eight-navy.vercel.app/

Dev Academy Aotearoa – Student/Junior Full Stack Web Developer
New Market, Auckland
06/2023 - 09/2023
During this *15-week* intensive bootcamp, I devoted approximately **60+** hours per week to lectures, assignments, challenges, and side projects. This includes:

- Pair programming & problem solving most of the time.
- Small group projects and multi-day projects:
  - Small 2-day projects within groups of 3.
  - A total of **6** small projects have been built for each team and **2** multi-day projects including final project.
  - Team work and collaboration from the beginning: brainstorming idea, designing project structure, designing database and UI.
  - Using agile methodology and following it's principles in all group projects as an approach to project management.
  - Having experienced real-industry roles such as git lead, front-end, back-end, products owner.
- Human skills:
  - Public speaking.
  - Project management, presentation and demo experience.
  - Agile methodologies.
  - Team Collaboration.

- Non-violent Communication Strategies (NVC).

Dos Amigos Mexican Cantina - Sous Chef
Mission Bay, Auckland
02/2014 - 05/2023
Started out as a commis chef (which could be similar to an intern in the dev world), I have quickly trained and worked myself up to the Senior Sous Chef position (equivalent to a senior/tech lead in tech) in one of the busiest restaurants in Mission Bay (a **80**-seater restaurant with **30+** employees and **$2M - $2.5M** revenue annually). My role include:
- Team-work Expertise:
  - High-pressure kitchens are the epitome of teamwork, where communication and cooperation are non-negotiable.
  - Fostered an environment where everyone is on the same page and working towards a common goal.
  - Multi-tasking and collaboration: ability to jump in any section to help when needed (similar to a full-stack developer in the tech-world).
- Adaptability under pressure.
- Attention to details.
- Creativity and problem-solving:
  - Creating and cost-managing menu items.
  - Participating in redesigning the system, efficiently cutting down total costs and expenses by over 20% despite inflation and food cost increases.
  - Developed solutions to increase revenue during off-peak seasons (events catering, takeaway items, etc).
- Leadership:
  - Experiences managing team of **10+**.
  - Ability to delegate tasks efficiently depends on each member's strengths and weaknesses, while maintaining a clear vision of culinary goals.
